Title of Image: #GetTheLeadOut

Lead-Safety Message: I once read : We don't believe in coincidences as much as we believe the erring government officials having the strong motivation and capacity to escape from official accountability by silencing the plaintiffs and witnesses for good. "That resonated with me and mine. Flint happened in in the US in 2014, and I was all too aware of the disasterous consequences of plumbism. . My families case has been going on since 2003 & WE WILL NOT BE SILENT. VAP gives voice to victims of lead poisoning and we are graetful for this oppportunity to share awareness.

Title of Image: What Lies Beneath

Lead-Safety Message: Lead contamination can have a domino effect on the environment and wildlife

URL : <https://volcanoartprize.com/portfolio-item/what-lies-beneath/>

Description of Work: This quiet scenery of a bush, a creek and a duck has a hidden danger of environmental hazard. What lies beneath the ground behind the bush on the left is soil with a high lead content. The buried lead can be harmful for people who work on the soil or eat vegetables grown on the soil. Furthermore, chemical leaching to the creek's water may also impact the wildlife in situ, or downstream.

The LEAD Group advocates that Australia reduces the lead limit in new residential AND industrial paint from 1000 ppm down to 90 ppm – and thus set a global precedent.

Artist's Name: Elizabeth O'Brien

Title of Image: GAELP Ban Lead Paint poster for ILPPWA 2018

Lead-Safety Message: The UN & WHO Global Alliance to Eliminate Lead Paint (GAELP) encourages every country to set a limit of 90 parts per million (ppm) for new paint. As well as announcing Volcano Art Prize winners, The LEAD Group will launch the Australian campaign for this "lead paint ban" during International Lead Poisoning Prevention Week of Action (ILPPWA) 2018 - 21st to 27th October 2018.

Description of Work: family Photo (description from Interwebs) John H. Cole Memorial Outlook : LOVE ONE ANOTHER "Short History Prehistoric evidence indicates that Webb Memorial State park was a seasonal campsite for Native Americans. After European contact, the site was likely used for farming and grazing. In the 1860s the site became part of the Bradley Fertilizer factory, and was used for dumping industrial waste. In the 1950s the property was owned by the U.S. Government to house NIKE missiles in underground silos, and was one of approximately ten sites in the Boston area controlled from Hog Island (now Spinnaker). Military use ended in 1977 and the site was transferred to the Commonwealth of Massachusetts. Since this time, the site has been configured to serve as parkland.
